The GMC Sonoma is a compact pickup that dates back to the early 1970s and didn't come into its own until a decade later. It all started with the Isuzu KB, which was marketed as the Chevy LUV. Thanks to the oil crisis that rocked the auto industry during the '70s, it became a priority for GM to begin production on its own light pickup. Although recently embattled by financial difficulties, General Motors has still managed to build and maintain a reputation through the years for creating good quality vehicles at affordable prices, and has been behind several of the more popular automobiles available worldwide.
