

Download Improving Your Garden Through Soil Management

Improving garden soil can mean the difference between a bountiful crop or disappointment at harvest time. Assuming your garden is in an area that will get sufficient water and at least 6 hours of full sunlight daily then spring is the time to get the soil ready. "A garden is a reflection of the quality of its soil. Gardens filled with beautiful soil have a vitality about them that we can almost feel," says landscape designer and author Jan Johnsen.. Achieving that vitality requires understanding the chemistry and composition of your soil and creating the perfect environment for fertile plant growth. We offer only the highest quality mulch, compost and soil products to our homeowners. Our mulch products add nutrients to your soil while setting the backdrop to show off your plants. Fairfax County, Virginia - Northern Virginia Soil and Water Conservation District: Control Heavy Runoff, Prevent Erosion & Pollution, Tree & Shrub Seedlings, Horse Pasture Advice, Urban Agriculture, Rain Barrels, and more.
