Advancing the Science of Ultrasound Guided Regional Anesthesia and Pain Medicine. iPACK Block See More. PoCUS See More. Regional Anesthesia Ultrasound has become a recent "standard" to perform regional anesthesia. This website features single shot and continuous nerve block techniques. As anatomic recognition remains essential to placing blocks, even with realtime visual guidance, specialty society guidelines for training residents and fellows continue to stress the importance of anatomical dissection and gross anatomy training as an inherent component of learning ultrasound-guided regional anesthesia (UGRA). Workshop is intended for both the beginner and the more experienced provider in ultrasound-guided regional anesthesia that want to expand their knowledge and/or incorporate a variety of nerve blocks into their practice.
